ALIENS IN THE GARDEN - Display Only - (Gossard, J.)2011 - Heavenly Gardens.(TETRA HOLLY DANCER x BALI WATERCOLOR) Tetraploid 36" Mid seasonDormant emo fr 7.5" 3-4 way branching18-22 buds. Fertile both ways. Rebloomer. First of its kind in tetraploid UFO's. It is my best broken pattern breeder.It stamps the patterns on its kids. The broken loss of color is a dominant trait, easily passed on to the kids. Flowers are garnet red with a green throat. Both sepals and petals are patterned. Flowers are UFO crispate and cascade.

ALL MY LOVE TO YOU - Display Only - These clear, dark burgundy flowers have sharply contrasting glittery gold edges. The 5 to 5.5 flowers bloom in the mid-season on 26 scapes with 3 branches, 18 to 20 buds. The full rich color holds all day. SEV. Tet.(Rice 2008) Double fan

BLUEBERRY DREAM - Display Only - BLUEBERRY DREAM (Stamile, P. - Pierce 2011) TET 7218 {(Calling All Angels x Precious Candy) x Sense of Wonder} 28 E Re, Fr. EV, 5.5 5 way branching, 30 buds. The light orchid based petals have a large bulls eye eye of dark blueberry purple, and has the matching coloration in the picotee. The blueberry picotee is then edged in white silver/white knobs. green throatEasily fertile both ways.

BLUE DUDE - Display Only - BLUE DUDE (Rice, J & A 2007) Tet "Big and Beautiful" This large, bitone flower has blue-lavender petals with a violet watermark and subtle white midribs highlighting the center of each petal. 6 to 6.5 inch flowers on 29 inch scapes with 3 to 4 branches. Strong plants with dormant foliage.Mid season.

BLUE MIRAGE - Display Only - (Morss) 28 ML Re Ex Ev 4 7 /15. The color is clear in shades of violet with a blue violet watermark eye and yellow-to-green throat. Somewhere in shades between violet and indigo, is the color of the blue-violet watermark (mirage) eye. The form is full with wide, overlapped, tightly ruffled segments. The texture is smooth and silky. This plant is extremely pod and pollen fertile, giving exceptionally clear seedlings with patterns, watermarks and eyes in the blue realm. Strongly recurrent scapes. Very fertile.

BUTTERFLY KING - Display Only - (Gossard, J.)2011 - Heavenly Gardens. (Etched Eyes x Forever in Time x Tetra Crystal Blue Persuasion) Tetraploid 29" Mid season Evergreen emo fr 5" 3 way branching 18 buds. Fertile both ways. Rebloomer Butterfly King is cream yellow flower with a butterfly pattern, consisting of blues, oranges, whites, purples, violets, and maroon colors. Colors are also carried around the petal edges. I had garden name as Jagged eye, because of the jagged outer maroon eye zone. Imagine if we could get these jagged streaking's to cover the flower. Some small jagged teeth are sometimes seen. A good parent for producing Butterfly patterns

CAVE LION - Display Only - (Gossard, J.)2011 - Heavenly Gardens. (Sword Dancer x Yellow Dynamo) Tetraploid 30" Midlate season Hard Dormant emo fr 7.5" 3-4 way branching 15-18 buds. Fertile both ways. Rebloomer Cave Lion is a polychrome orange yellow flower. The petals are surrounded by long filigrees and tendrils. They are just covered with 24 carat diamond dusting. A rare color combination. A great parent for producing a different look.

CLARK GABLE - Display Only - 28 E Re Ex Sev 6. Mother Nature outdoes herself with this one. The flower is an intensely saturated, bright persimmon orange self with splashes of pink infusion, especially on the sepals. The color is clear with great carrying power. An EMO, the sublime, sculptural form is petaloid style with ruffles, loops and tentacles. Fine color fastness, smooth finish and great consistency are its hallmark. Recurrent, well-branched scapes. Pollen has yielded phenomenal seedlings from orange coral-rose. Pods are moderately reluctant. 99% double

COIT TOWER - Display Only - *COIT TOWER (Stamile, P.) 2010 TET 8111-B (Magical Mystery Show x Midnight Candy) 42 EMre Fr. Ex. Ev. Crispate 6 5 way branching, 40 buds. Our tallest full form to date at 42 high. A tower in the garden. The dark purple petals are edged in white bordering the black picotte. What makes Coit Tower unique too, is her crispate pinched petals, giving her an extra flare. Fertile Both ways

COSMOPOLITAN TRUFFLE - Display Only - (Kirchhoff 2008) 22 26 EE Re Ex Fr Ev 5 - 6. Pink, pink pink! Pink is the hallmark of this pastel, coral, peach pink of exceptionally wide proportioned and exquisitely formed Double blossoms! An Early Morning Opener, the beautiful buds show great rose pink color, with fully opened flowers lasting for nearly 24 hours. The form is petaloid, and the outer petals tend to roll back as the temperature rises into the nineties. The scapes are strongly recurrent, with 3 way branching. This one reblooms up to 3 sets in Kentucky! Fertile both ways. 99.9% Double.

DRINK THE WIND - Display Only - Rice, J & A 2011 6 flowers x 34 tall, mid season. 2-3 branches, dormant, tetraploid. Sunset yellow and desert sand with rose infusions. Very fringed golden edges, especially on the petals. Fertile both ways.

FIRE BLAST - Display Only - (Gossard, J.)2011 - Heavenly Gardens. (Webster's Thunderbolt x Megatron) Tetraploid 39" Mid season Dormant emo fr 10" 4-5 way branching 18-22 buds. Fertile both ways. Rebloomer Fire Blast is a hot flaming red with a whiter red watermark. Throat is very green. Flowers are UFO crispate. As you can see in lower photo Fire Blast has super 5 way branching. A difficult trait to get in such a large flower.

GIANT SPIDER - Display Only - (Gossard, J.)2011 - Heavenly Gardens. (Radioactive Curls x Heavenly Mr. Twister) Diploid 35" Mid season Dormant emo fr 10" 3-4 way branching 18-22 buds. Fertile both ways. Rebloomer True spider Ratio is 9.1 to 1 UFO Viable crispate-cascade Giant Spider is the narrowest daylily Jamie has introduced. Ratio can be variable do to growing conditions. Color is a garnet red with a very green throat.

GIANT TERATORN - Display Only - (Gossard, J.)2011 - Heavenly Gardens. (Rouge and Curls x Primeval Force) Diploid 33" Mid season Dormant emo fr 13" 3 way branching 18 buds. Fertile both ways. Rebloomer Giant Teratorn is the biggest diploid daylily Jamie has introduced to date. The Wing span is over 16 inches. Converted, who knows, may be 20 inches. It is a hard Dormant. Grows in zone 7, but much happier in zone 5. Color is lavender pink with deeper maroon pink eyezone. Throat is yellow green. It is a UFO cascade and true spider with ratio of 7.5 to 1.

GLOWING QUASAR - Display Only - Rice, J & A, - 2010 38 mid-late 6.50" dormant, 3 branches, 19 buds, TET Garden visitors and daylily aficionados as well as daylily new-bees, have gravitated immediately to this energetic ball of fire! Its brightness glares out and doesn't extinguish at all even after a full hot sunny day of showing itself off! The sparkling gold edge seems to sprinkle out with gold tendrils and hooks completing its ode to the Gods of solar power.

GOD SAVE THE QUEEN - Display Only - 30 E Re Ex Ev 7 The color is medium orchid with a half-inch wide purple border, and lilac splashed filigree. This purple edge (flecked with shades of lilac) is encircled with yellow gold filigree and elaborately embellished with talons and sparkles of diamond and amethyst. The eye shows phenomenal color saturation in imperial purple, above the yellow to green throat. The EMO form is full, quite flat, overlapped, and widespread. Many cross tags will read GSTQ, because H. God Save The Queen is a very fertile parent both ways. Its kids easily display embellished double and triple edges. The strongly recurrent scapes are branched 3-4 ways, with 26 or more buds

GREEN PYTHON - Display Only - (Gossard, J.)2011 - Heavenly Gardens. (Emerald Lady x Green Inferno) Diploid 38" Mid season Dormant emo fr 8.5" 3 way branching 18 buds. Fertile both ways. Rebloomer Green Python is a green crispate-cascade true spider. Flower color is a chartreuse green with a very green throat. Spider ratio is 6.3 to 1. A very good parent for green hybridizing

HAWKWOMAN - Display Only - (Gossard, J.)2011 - Heavenly Gardens. (Time to Fly x tetra Skinwalker) Tetraploid 30" Mid season Dormant emo Vfr 11.5" 3 way branching 18 buds. Fertile both ways. Rebloomer Flowers of Hawkwoman are lavender pink, with bitone sepals and green throat. Unlike its parent TIME TO FLY, HAWKWOMAN appears to be flying in mid-air. Flowers are patterned with double arrow heads of lighter and darker pink. Flowers are huge, stretching out to 13 inches. Hawkwoman meets both the cascade UFO and spider requirements. Spider ratio is 4.12 to 1. A very good flower for producing huge patterned UFO's and true spiders

HORSING AROUND - Display Only - (Rice, J & A 2011) 5.5 flowers x 44 tall, mid to mid-late, 3-4 branches, dormant, tetraploid. Pale rose with light yellow edges on all segments and teeth on the petals. An unusually tall, toothy daylily. Fertile both ways.

HYBRIDIZER'S TRUFFLE - Display Only - (Kirchhoff 2008) 36 M Re Ex Ev 5 . This unique Double is a medium orchid and ivory lavender bitone with a strong lilac watermark halo. Throat is yellow to green. Form is petaloid style, widespread, and overlapped. Color is clear and sunfast. Substance holds well in hot sun.

Blooms can have great variation in form and markings. Extremely fertile both ways and a great parent for taller scapes, bitones and lavender/orchid/amethyst/purple offspring. 3 way branching and 20 buds. 98% Double.

HYMN TO HER - Display Only - (Rice, J & A, 2010) 5.5 x 35 late season, dormant, 4 branches, 21 buds, TET Celebrate the reverence of the feminine wiles. Gracing us at the later part of the season, she comes forth with all of her class and allure. The light pink is a sweet reminder that she is all girl, yet with her branching she says I am no pushover! HYMN TO HER is a tribute to all those who can identify with her magical charms.

JEFFERSON DAVIS - Display Only - (Rice, J & A, 2009) 6 x 29, mid-late, semi-evergreen, 4-5 branches, TET Metal grey-lavender petals with grayed violet watermark, green throat and narrow white ruffled edges. Blooms for over a month in Kentucky hybridizer's garden.

LOTUS POSITION - Display Only - (Rice, J&A, 2007) This amazing flower draws you in with her very large, creamy watermark which is crowned by the reddish burgundy pinched petals with golden edges. Her unusual form, large stature and natural beauty have made her one of the top garden favorites. The bicolor blooms are 5.5" to 6" on 38 inch scapes which have 3 or 4 branches. Bloom starts in the early mid season and there is often rebloom.

LUNAR LAGOON - Display Only - (Morss 2011) 30 M Re Ex Ev 5. A quick glance and one sees a green overlay to this lovely pastel yellow with double to triple zone, web-pattern eyezone. The patterned eye is shades of lavender and purple, with a wine outline that sets it off to great effect. The picrust edge repeats the colors in the eyezone and it often sprouts a pretty set of teeth. Its large throat is yellow to green and the shape is quite flat. The texture is smooth; substance is heavy; color is sunfast. Fertile. Scapes have three way branching and 20-25 buds.

MAGIC MAKER - Display Only - (Gossard, J.)2011 - Heavenly Gardens. (Long John Silver x Lots of Laughter) x (Lavender Curls) Diploid 42" Mid season Semi evergreen emo fr 8.5" 3-4 way branching 18-22 buds. Fertile both ways. Rebloomer Magic Maker is a 8 1/2 inch candy lavender orchid flower. Color is one of a kind. Magic Maker has a whiter edge around both petals and sepals. Throat is extremely green. Eye zone is a deep orchid purple. Form is UFO cascade. The color and green throat which is passed onto the kids are incredible. Many years ago I got a Ra Hansen flower from Dan with great color, the first seedling, pod parent was the seedling. Thanks Dan and Ra! She had some colors that I have never seen in daylilies, it was never introduced. Magic Maker carries on her line. This flower is a true magic maker in the seedling patch. One gets an extremely large amount of keepers.

MAGNIFICENT GRAPE - Display Only -(Stamile, P., 2010){ Violet Becomes You x[(Scarlet Lace x Sdlg) x Complementary Colors]} 34 EMRe emo Ev. 6 1/2 5-way branching, 40 buds. Our first orange to orange gold edge on a purple. Wow, like the first green edges, the orange edge of MAGNIFICENT GRAPE offers a whole new direction in color, and color combinations. A great scape builder! Fertile both ways.

MISSISSIPPI BLUES - Display Only - (Stamile, P. 2006){[(Sheerwater Blues x Tetra Elfin Etching) x Delta Blues] X Tetra SEEING BLUE} 28 EMRe. emo. Ev. 5 x 2 x 2. 6-way branching . 35-40 buds. MISSISSIPPI BLUES shows the magic of a clear multicolored eye of fuchsia, lavender and blue. Strong erect, wiry well branched scapes present the flowers perfectly for the show table or garden setting. A super daylily and a fine new addition to the class with some new genetics to add to the mix. Fertile both ways.

NINOTCHKA - Display Only - (Rice, J & A, 2010) 5.5 x 36, blooms mid thru late season, semi-evergreen, 3 branches, 18-20 buds, TET NINOTCHKA casts her spell with alluring shades of yellow, rose and gold. The petal edges are ornate and tempting.

PERSISTENT BUTTERFLY - Display Only - (Stamile P. 2010) Tet 29 EMRe. emo Ev. 5 5-way branching, 35 buds. Cream white petals with a big blue eye pattern. A fuchsia ring outlines the blue eye of PERSISTENT BUTTERFLY above a green throat. A double edge of white and blue matches the blue eye. Low arching foliage. Fertile both ways.

PICOTEE PRISM - Display Only - (Stamile, P. Pierce 2011) TET (Sulphurite Prism x Tet Malachite Prism) 27 EM Re, Fr. DOR, 5.5 3 way branching, 20 buds. Next to PIKES PEAK this was that unusual daylily everyone wooed over. PICTOEE PRISM is not as tall as our other prisms, but she makes up for it with the strong plum picotte edge not seen on any of the other prisms. Being a dormant I suspect scape height will be much higher in the north. Fertile both ways.

PINS AND NEEDLES - Display Only - (Rice, J & A, 2010) 5.5-6 x 26, mid season, dormant, 2-3 branches, 14-20 buds, TET Our toothiest daylily yet! Weve been waiting on pins and needles to introduce this exciting progeny of BASS GIBSON. These flowers have elaborate edges consisting of teeth, tendrils and other protuberances even on the sepals.

PRIMEVAL FORCE - Display Only - (Gossard, J.)2011 - Heavenly Gardens. Diploid 46" Mid season Dormant emo fr 8.5" 3-4 way branching 18-22 buds. Fertile both ways. Primeval Force is a huge twisted crispate-cascade UFO. Petal colors are maroon - pink with a deep purple maroon eye zone. It has a very green throat. The sepals are edged cream pink and are reverse bicolor. Also notice the extreme ruffling on the sepals. It very hard dormant. It will grow in the green house but does much better outside. Too dormant for my deep south customers. Has been a great hybridizing parent for me. I have several narrow futures, but the ones I like were taken back to my Smoke Scream and Emerald Starburst

PURPLE STARFISH - Display Only - (Gossard, J.)2011 - Heavenly Gardens. (Delta Force x Waiting in Wings) Tetraploid 35" Mid season Semi-Dormant emo fr 8.5" 3-5 way branching 18-25 buds. Fertile both ways. Rebloomer Purple Starfish is a huge purple flower with a dark purple eye zone that covers most of the flower. Flower form is UFO cascade. Throat is very green. Like its parents Delta Force, Heavenly Island Magic and Waiting In The Wings, bloom is early. What sets it apart from its parents, besides being bigger is its fall rebloom. Flowers are over 12 inches when laid out flat. Has been a great hybridizing daylily.

PURPLE TARANTULA - Display Only - (Gossard, J.)2011 - Heavenly Gardens. Diploid 52" Mid season Dormant emo fr 8.5" 3-5 way branching 18-25 buds. Fertile both ways. Rebloomer Purple Tarantula , what a great name, looks just like a giant tarantula. Just wish it had a total of 8 petals and sepals. Purple Tarantula varies in size do to its changing form. Flower size is between 8 and 12 inches. It is a maroon purple with a huge purple eye zone. the throat is very green. Form is UFO cascade. The veining in the throat is outstanding.

RED BALLS OF FIRE - Display Only - (Stamile, P.)2011 TET {(Roses and Gold x Cerise Masterpiece) x [(Sdlg x Bella Sera) x Roses & Gold]} 32 EM Re, Fr, EV, 5.5 4 way branching, 30 buds .Not as intense red as RUBY RIDGE, but a very beautiful red blossom none the less. The tightly ruffled round petals are embedded around the edge in brilliant gold bubbles. Long gold tear drops appear on re bloom flaring out from and around the flowers rim. Fertile both ways

RED TAILED FOX - Display Only - Kirchoff 2011 - 32 EE Re Ex Ev 5.25. It is the color of passion. It is on the red side of rose-red, intense and saturated. The color deepens as it shades into a small yellow to green throat. The form of the flower unfolds differently in the earliest part of the season, sometimes with unusual, variable and attractive sculpting, often echoing the patterns in throats color and texture. The ruffles are wide and pleated. Being extra early, Red Tailed Fox is one of the few highest caliber reds in bloom when it turns on in the garden explodes with color. Recurrent. Fertile.

REINING - Display Only - Rice, John and Annette 2009 - 5.5-6 x 24, early-mid season, rebloom, semi-evergreen,2-3 branches,TET A rich, clear rose-pink and sparkling light gold edge. Garden judges have commented on its unusual and beguiling shade of pink. Flowers rest nice and high above the foliage.

RIVIERA SCARLET - Display Only - (Kirchoff 2011) 30 E Re Ex Ev 5.75. Named for a customer (she claimed to be a jazz-singer at a Bessemer City, AL nightclub) whose stage name was Riviera Scarlet. Blooms appear covered in layers of lipstick -seemingly upholstered in luminous black-red velvet. The form is flat and widespread and displays a dramatically patterned, yellow to green throat. Petals are discreetly ruffled and they roll back fetchingly as the season progresses. Reblooms. Fertile.

RUBY RIDGE - Display Only -(Stamile, P. - Pierce) 2011 TET {(Born to Run x sdlg) x Big Red Wagon} 30 EMRe, Fr. , EV. 6.5 5 way branching, 30 buds.RUBY RIDGE is a big flower with so much going for her. Bright clear color of true ruby red with a dark green throat. Wide, and very ruffled petals especially for a red! And how about that strong white edging, which also sports little white teeth! Fertile both ways

SOLAR BLAST - Display Only - (Gossard, J.)2011 - Heavenly Gardens. (Double Dish) x (Double Plus x Wildest Dreams) Diploid 39" Mid season Dormant emo fr 7" 3 way branching 18 buds. Fertile both ways. Rebloomer Solar Blast is a tall dormant UFO variable cascade-crispate Double. Flowers are 7 inch yellow-peachy pink polychrome with a green throat. I do not remember it not being double. Two thirds of the Genetics from Miles double line, which was a hardy double line. Form is variable hose in hose.

SUPER GIRL - Display Only - (Gossard, J.)2011 - Heavenly Gardens. (Devine Inspiration x String Bikini) Tetraploid 46" Mid season Dormant emo fr 10" 3-4 way branching 18-24 buds. Fertile both ways. Rebloomer UFO cascade, true spider 4.0 to 1 (petals 7" and 1 3/4 " wide) Supergirl is hot rose pink with a green throat. Flowers are UFO cascade. It is a true spider with a 4.0 to 1 spider ratio. Flowers measure over 12 inches when spread out.

TRUFFLE MYSTIC - Display Only - (Kirchhoff) 30 E Re Ex Ev 6. A dream truffle .with compound layers and patterns, complex edges; lilac infusions on top of apricot cream; subtle, greyed lilac watermark-bands above a halo patterned throat. The form is petaloid style with full petaloids edged in teeth and filigree. The scapes are well branched and strongly recurrent. Fertile. (Dont Look Back x Jagged Edge) X Seedling

UNBRIDLED SPIRIT - Display Only - (Rice, J & A, 2007) This darling flower gets its name from her untamed edging and ethereal coloring. The beautiful, creamy petals have a pastel blush that's framed by the distinctive edge. Hooks, teeth and tendrils covered with gold glitter adorn the edge. 5 inch flowers on 33 inch scapes with 3 to 4 branches. Blooms in the mid late season. Dormant foliage. TET.

VAMPIRE BAT - Display Only - (Gossard, J.)2011 - Heavenly Gardens. Tetraploid 48" Mid season Semi-Evergreen emo fr 8.5" 3-4 way branching 18-22 buds. Fertile both ways. Rebloomer Vampire Bat, this photo is worth ten thousand words. Vampire Bat is a deep purple black flower with 1/2 to 1 inch vampire bat like teeth. The teeth are purple and gold. The gold is diamond dusted. Throat is orange-yellow. UFO cascade. A super breeder plant for UFO toothy daylilies.

WAGON DRAGON - Display Only - Kirchhoff 2011 - 30 E Re Ex Sev 4.75. The color is blood-red overall, with a blue sheen. During part of the bloom cycle, the sepals become a lighter rose-red color and the flowers become a bitone. The form is unforgettable with dramatically ruffled edges and sepals often edged in near white. A clump of this is as a spellbinding display of color from one end of the garden to another. The scapes have four way branching and are strongly recurrent. Fertile both ways.
