BART ROBERTS - \$90 - Patrick Stamile 2008 -27" TET EEEv 6.5" RE - very large orchid rose with a huge velvety blue red eye. Both clarity and vibrancy of color is fantastic. Siblings to BART ROBERTS also had prominent white sharks teeth outside the red border so it is expected that BART ROBERTS may be useful in structural edges as well as borders. Fertile both ways.

BOLERO EYES - \$75 - Carpenter - SPRING 2008 - TET 33-EMRe-6.5-EV - Stately large flat-faced flowers of excellent substance. Pink flowers which have bold eyes and edges of a magenta color, with a lovely green throat. Three-way branched scapes bear 17 buds. The cultivar is fertile both ways.

CHERRY SWIZZLER - \$125 - Stamile, P.2009 - 42 TET EE 12" Re -16 wingspan. 5-way branching (3 laterals plus terminal y). 35 buds. Classic spider. Spider ratio 6.1:1. This is one of our earliest flowers to bloom. When CHERRY SWIZZLER begins blooming there is literally a sea of green as a backdrop. Blooms are out-facing on tall well branched scapes. Both petals and sepals twist and curl as they cascade down. A lovely addition to the EE class. Fertile both ways but a difficult pod parent.

ELEGANT HARMONY - \$75 - Carpenter, J.2008 -24 TET EMid EV 5 RE such a beautiful blending or combination of colors. The sepals are of a lighter coral pink and the petals have a moderately deeper coral pink color and are extravagantly edged with yellow pleated and ruffles. The flowers have lovely green throats. Three-way branched scapes bear 15 buds and plants repeat their bloom cycle. Fertile both ways.

MINT OCTOPUS - \$50 - Stamile, P.2009 -32 TET EMEv8 RE- Beautiful LONG PETALLED mint green blend. Incredible bud count and branching. Its green cast offers a cooling aspect to the ordinarily hot colors of the daylily garden. Fertile both ways.

RINGS OF WONDER - \$150 - Stamile, P.2009 -28 TETESEv 5.5" RE
-somewhat of a misnomer since the rings of color sometimes appear as pointed metallic chevrons of color along with the more traditional rings. The color is basically a cream yellow with a multicolor eye of plum and lavender. The eye sometimes can appear to be bands of deep lavender and light lavender as the plum morphs into a more lavender mode. Fertile both ways but a difficult pod parent.

TEXAS CARNIVAL DANCE - \$35 - Carpenter, J.2007 -28" DIP E Ev 5" RE
-Looking at a clump of this brightly colored little flower one is given the impression of joy and frivolity, happiness and dancing. The flowers just seem to be spinning around and whirling as in a dance spin. TEXAS CARNIVAL DANCE is one of our earliest bloomers and repeats well and is in full bloom now at the end of June. Scapes have 5-way branching with 23 buds and repeat. Fertile both ways.
