

Twig's Garden

General Listing

<http://DaylilyFans.com/twigsgarden/>

Created: Sunday May 06, 2012

A GREEN DESIRE - \$30 - (White-D., 2006) Height 25", bloom 7.5", season M, Rebloom, Semi-Evergreen, Diploid, 18 buds, 5 branches, UFO Cascade, Light yellow near white blend above lime yellow throat. (sdlg Jan's Twister) Price is for double fan.

AUTUMN MINARET - Display Only - Award of Merit candidate. Despite being moved this spring, this cultivar is blooming as the champ it is. It's not the form that's great, it's the performance that it delivers which has earned it as a favorite spot in so many gardeners' hearts.

BEWARE THE WIZARD - Display Only - (Couturier-G., 1995) Height 37", bloom 8", season M, Semi-Evergreen, Diploid, Spider Ratio 4.40:1, Double, Polymerous 75%, Orange red with dark red eyezone above a gold throat. (DOUBLE BOW TIE FIRESTORM)

BLAYNE ATTRACTION - \$40 - (Warrell, 2003) Height 34", bloom 9", season MLa, Dormant, Diploid, 15 buds, 3 branches, Spider Ratio 4.25:1, Deep gold self above green throat. (Carolicolossal Asiatic Pheasant). If you like them bold, big and late, this is the one for you! Price is for full sized double fan.

CAMEROONS - Display Only - (Munson-R.W., 1984) Height 28", bloom 5", season M, Rebloom, Evergreen, Tetraploid, Claret self with yellow green throat. (Siamese Royalty Royal Heritage)

CAMEROONS TWISTER - Display Only - (Benz, 2000) Height 40", bloom 7.5", season MLa, Rebloom, Dormant, Tetraploid, Fragrant, 40 buds, 5 branches, Unusual Form Crispate, Wine purple with pale watermark and eye above green throat. (Cameroons One Step Beyond) Excellent plant in my yard, fertile both ways. I've been working on getting that watermark and twisting onto longer petaled daylilies.

CHALK TALK - \$50 - (Warrell, 2006) Height 32", bloom 8.75", season EM, Dormant, Diploid, 14 buds, 2 branches, UF Crispate, Light rose with darker brushed chevron eye above green throat. ((Spiral Charmer Parade of Peacocks) (Starsearch Jazz)) The absolute star of my garden in 2009, with TWICE as many branches and buds as what is registered! Just look at the "crown" of buds! Very limited availability due to digging in 2010. Price is for double fan+. Hybridizer is currently sold out.

CHEROKEE PATTERNS - Display Only - Cleopatra used to be a favorite for its bold eye, however, it does not survive well in the north. This, in my humble opinion, should be the new standard.

CHICAGO SILVER - Display Only - (Marsh, 1973) Height 30", bloom 6", season M, Semi-Evergreen, Tetraploid, Purple edged silver with darker eyezone and green throat. (sdlg Chicago Two Bits) My original theory of working with tets was to go back to the early narrow-petaled things that do well up north for me. I still have a few around.~)

CLASSY LADY - Display Only - (Warrell, 2005) Height 32", bloom 8.5", season M, Dormant, Diploid, 22 buds, 5 branches, UFO Crispate, Flamingo pink above green yellow throat. (Pink Cricket (Lake Norman Spider Starsearch))

DAMSEL IN DISTRESS - Display Only - (Lambert, 1985) Height 30", bloom 7", season M, Dormant, Diploid, Very Fragrant, Purple self with green throat. (Ancient Art Ethel Ruthrauff) I'm always a bit surprised when I see DID, because its wonderful dark color reminds me so much of Ned Roberts' John's Heritage. There's a reason for that - DID is the pod parent of John's Heritage.

DATE BOOK - Display Only - (Wild, 1971) Height 40", bloom 6", season EM, Rebloom, Dormant, Diploid, Baby ribbon pink with tangerine throat. One of the first daylilies that started my addiction, it was given to me by a very sweet club member.

DESTINED TO SEE - Display Only - (Grace-L., 1998) Height 24", bloom 6", season EM, Evergreen, Tetraploid, Fragrant, UFO, Cream yellow with lavender eye and edge above yellow green throat. (sdlg Create Your Dream)

DINETIZA - Display Only - (Mayo-D., 1973) Height 30", bloom 7.5", season M, Dormant, Cherry red self with olive throat. (GALA SEASON ANNIE WELCH) NOTE: This may be an oldie, but it's a screamer in the garden, is not readily available from other sellers and is one of my all-time favorites!

DIVINE DESIGN - Display Only - (Warrell, 2000) Height 28", bloom 6", season E, Dormant, Diploid, 30 buds, 3 branches, Unusual Form Crispate, Cream rose orchid with cream lime green veins. (Fun Fling (So Lovely Yellow Ribbon))

DON'T KNOW JACK - Display Only - This one always kept me guessing, because its form is so unusual, it didn't seem to know which way it wanted to head every day it bloomed. Always the personality.

FOXHAVEN ENIGMA - Display Only - (Bowman, 1998) Height 27", bloom 6.5", season M, Semi-Evergreen, Diploid, 15 buds, 2 branches, Plum blend with thin white edge and purple beige band above yellow throat. (sdlg Black Plush) Please check for availability.

FUNKY MONKEY - Display Only - (Schwarz-B., 2005) Height 34", bloom 5.5", season MLa, Rebloom, Dormant, Tetraploid, 40 buds, 4 branches, Dark lavender self above green throat. (Riddle Me This Wiggles Worth) I received this as a gift plant at the National in '07, best gift plant I've ever received! Very nice budcount and contrary to Bob Schwarz' comment, has been very fertile for me both ways, but does not rebloom for me. Try as hard as I could to get a good pic, this pic is too saturated.

GADSDEN FIREFLY - Display Only - This is a very small bloom, but heavy on the branching!

HELIX - Display Only - (Stamile, 2002) Height 33", bloom 9", season EE, Rebloom, Evergreen, Tetraploid, 30 buds, 5 branches, Spider Ratio 4.33:1, Bordeaux red above green throat. (Inky Fingers Web Browser) Not as big as Web Browser, but fertile both ways.

IN REVERSE A - Display Only - (Reinke-J., 2006) Height 39", bloom 8", season La, Dormant, Diploid, Very Fragrant, 30 buds, 4 branches, UFO Crispate-Cascade, Creamy yellow rust red reversed bitone above deep green extending to a large cream yellow center throat. (Coral Spider Starman's Quest) This is a HOLY COW plant that I don't know if anyone has really used in breeding before! There are currently no children registered from it, even though it is pod fertile. (I didn't try the pollen.) Because it's a dip, I got a number of pods, which was expected.

IN REVERSE B - Display Only - However, during a recent discussion on a robin with Joyce Reinke, she informed us that it was a chimera for her. This was shortly before it finished blooming for me, so I put tet pollen on a few of the last blooms. ONE OF THEM TOOK! Would you like to know who with? Texas Pink Longhorn, who could benefit from some branching. YAA HOO!!!

JACK BE NIMBLE - Display Only - This is a hottie!

JULIE NEWMAR - Display Only - (Morss, 2000) Height 32", bloom 7", season E, Rebloom, Evergreen, Tetraploid, 30 buds, 4 branches, Pastel peach with purple spider web washed eye and purple outlined gold edge above yellow to green throat. ((sdlg Fortune's Dearest) Gerda Brooker) This one needs to go south - make me an offer.

KOKO TWIST - Display Only - (Roberts-N., 2005) Height 36", bloom 7", season M, Dormant, Diploid, 24 buds, 4 branches, Unusual Form Crispate, Dark purple self above green throat.

LADY LIZ - Display Only - (Lachman, 1983) Height 28", bloom 6.5", season MLa, Dormant, Tetraploid, Lavender pink with white halo and pale lime throat. (sdlg Catherine Woodbery) I've gotten a few keepers out of Lady Liz x String Bikini.:

LATER ALLIGATOR - \$15 - (Reed, 1997) Height 28", bloom 6", season ML, Semi-Evergreen, Diploid, Ufo Crispate, Rose purple self with lemon throat. (CORAL CRAB TRAHLYTA) NOTE: Starts blooming early-mid in my garden and is one of the very last to finish. Super plant habit, love the radiation of the throat onto the sepals. Price is for double fan.

LATIN ROOSTER - \$100 - (Warrell, 2005) Height 32", bloom 8.5", season M, Dormant, Diploid, 20 buds, 4 branches, Spider Ratio 4.17:1, Deep rose orchid with wine red and white midribs above green throat. (Orchid Majesty Jack Sprat) If you like movement, this one will float your boat! Price is for a fully grown double fan, still \$125 on the hybridizer's website.

LAVENDER NIGHT SPIDER - Display Only - (Bawden, 2008) Height 36", bloom 9", season MLa, Dormant, Diploid, Ufo Crispate, Pale lavender self above green throat. (sdlg Lola Branham) Stunning presentation every time! This is one view. Extremely pollen fertile in 2011, not pod fertile this year.

LEE REINKE - Display Only - I was intrigued by her heritage, Give Me Eight x Give Me Eight. She never gave me any poly blooms, but I wonder what's possible in this delicate beauty's gene pool?

LILY MUNSTER - \$35 - (Shooter-E., 2004) Height 31", bloom 8", season M, Rebloom, Semi-Evergreen, Diploid, 12 buds, 3 branches, UFO, Lavender rose buff above chartreuse green throat. (Stack the Deck sdlg) I can't say enough about the size, substance and commanding presence of this bloom! It also has a 15 budcount in my garden. Price is for a fully grown out leek-sized double fan+, a northern Illinois-raised DF with no extra coddling whatsoever, which makes it that much more extraordinary, WHATTA PLANT!

LOCH NESS MONSTER - Sold Out - (Couturier-G., 1992) Height 25", bloom 7.5", season M, Dormant, Diploid, Spider Ratio 4.40:1, Silvery lavender spider variant with darker lavender halo above yellow green throat. (LAVINIA LOVE sdlg) NOTE: This is older, but it is one of the BEST all-around performers in my garden, year after year!

MAD JACKY - Display Only - This is the longest of my Guest plants blooming. Was in bloom on July 12 and continued until August 27.

MIKE MAN - \$65 - (Warrell, 2003) Height 29", bloom 8", season MLa, Dormant, Diploid, 15 buds, 3 branches, UFO Crispate, Bright red with deep red eye above green throat. (Holly Dancer Wildest Dreams) What a bloom! And pod fertile too! Price is for double fan. Hybridizer is currently sold out.

MORTICIA - Display Only - Just love this one, subtle, yet bold. Super performer with great movement in every bloom.

NORTH WIND DANCER - Display Only - 2011 Stout Silver Medal winner! CONGRATULATIONS, gary!!! (Schaben, 2001) Height 42", bloom 7.5", season La, Dormant, Diploid, Ufo Cascade, Pink lavender self above yellow green throat. (Lola Branham sdlg)

PECK'S POLY - Display Only - Itza poly.

PERU-B-RUBY - Display Only - (Wilkerson, 2007) Height 38", bloom 9", season E, Rebloom, Evergreen, Tetraploid, 20 buds, 3 branches, Unusual Form Crispate, Dark ruby red with rose watermark above green throat. (Cameroons Twister High Blaze)

PRAGUE SPRING - Display Only - (Lambert, 1985) Height 30", bloom 7", season M, Dormant, Diploid, Ufo Crispate, Flesh and green blend with pistachio green throat. (Ancient Art Cerulean Star)

RIBBONETTE - Display Only - (Lenington-G., 1951) Height 34", season M, Diploid, RL2: Red light with marking, bitone, or polychrome.

ROYAL VINTAGE - Display Only - (Warrell, 2010) Height 30", bloom 7", season MLa, Dormant, Diploid, 15 buds, 3 branches, UFO Crispate, Dark red with lavender watermark above yellow green throat. (sdlg Cold Cold Heart) One of the most used plants in the garden this year due to its watermark, which is unusual in a diploid UF. Both pod and pollen fertile. I'm super excited to have pods on some very special reds and a dark rose seedling!

RUSTY NAIL - Display Only - I'm not sure how it got its nomer, but it's anything but rusty!

SAINT ELMO'S FIRE - \$75 - (Warrell, 2005) Height 48", bloom 7.5", season EM, Dormant, Diploid, 28 buds, 5 branches, UFO Cascade, Red with yellow stripe above green throat. (Holly Dancer Wildest Dreams) Note from the hybridizer: "A bud builder with blooms from late June into September this year, with the unusual habit of blooming from proliferations along the scapes." A VERY long blooming plant and fertile both ways. Price is for a fully grown double fan, still \$100 on the hybridizer's website.

SANTA'S PANTS - Display Only - Sure is a cutie!

SCARLET BUTTERFLY - Display Only - Another very small one from Bill Reinke, very well branched.

SCARPIA - Display Only - A shocker with its green throat. Despite Bob Schwarz' warning that it may be a southern plant, it was much stronger here than one of its parents, Tet Satan's Curls.

SCISSORHANDS - Display Only - Very unusual form, this image is different from Clayton's description, but it was a gorgeous bloom, I had to show it. Pod fertile.

SKY OVER SCHUYLER - Display Only - What a hard to capture color on this one! This is an image of one scape. If it were to be shown in an AHS Show, it would have won Queen hands down. Blooms were always great, but on this scape, the placement of them were perfect. You can see that not one of them interferes with each other.

SPACECOAST SEA SHELLS - Display Only - (Kinnebrew-J., 2003) Height 30", bloom 5.5", season EM, Rebloom, Evergreen, Tetraploid, 23 buds, 4 branches, Cream with purple eye and edge above yellow cream throat. (Catcher in the Eye sdlg) Just for fun, I've crossed this with tet spiders. Fertile both ways.

SUGAR PLUM JAM - Display Only - There aren't enough supralatives to describe this color.

SWALLOW TAIL KITE - Display Only - Strong grower, can't beat the colors. Sorry, not for sale.

TECHNY SPIDER - Display Only - (Reckamp-Klehm, 1987) Height 21", bloom 7", season MLa, Dormant, Tetraploid, Fragrant, Yellow with pink cast and green throat. Always a favorite and the pic never does it justice. I've tried for years to turn it into a UF.:)

TENNESSEE RED - Display Only - This is a big one, folks. I wonder what genetics it has to give to our future?

TOO MANY PETALS - Display Only - As the hybridizer says, it is variable in amount of polyg. Can be 4 x 4, 5 x 5 or more.

TRIFECTA - Display Only - (Rice-J., 2007) Height 28", bloom 5.5", season MLa, Dormant, Tetraploid, Unusual Form Crispate, Rich purple self above green throat. Fertile both ways, I've been using this with taller cv's. GORGEOUS deep purple!

TURKEY TROT - \$60 - (Warrell, 2004) Height 28", bloom 5.5", season M, Dormant, Diploid, 17 buds, 4 branches, UFO Crispate, Rose with rose red chevron and veining above green throat. (RINGS AND THINGS sdlg) A MUST for those breeding for small UF's, this fabulous plant had a budcount in the high 20s in my garden! Pod and pollen fertile. Price is for a fully grown double fan.

WEB BROWSER - Display Only - (Stamile, 1999) Height 32", bloom 12", season E, Rebloom, Semi-Evergreen, Tetraploid, Fragrant, 15 buds, 2 branches, Spider Ratio 5.60:1, Red self with chartreuse throat. (((Star of India Long Stocking) (Star of India Tet. Green Widow)) Long Tall Sally) Pollen fertile, have not been able to set a pod on it. This may be an oldie, but it's given me some of my keepers as a "spiderer," a plant that elongates petals.

WEBSTER'S PINK WONDER - Display Only - Truly dwarfs most other cultivars, very strong grower.

WHITE SATIN - Display Only - (Bawden, 2007) Height 23", bloom 5.5", season M, Dormant, Diploid, White self above yellow throat. (sdlg Lola Branham)

WILD CHILD - Sold Out - (Salter, 2002) Height 24", bloom 6", season M, Rebloom, Semi-Evergreen, Tetraploid, Unusual Form Crispate, Coral with gold edge. ((Untamed Glory sdlg) (Ed Brown Startle))

WIRED - Display Only - I was in awe of the color, size and the spider ratio on this one!

WISPY RAYS - Display Only - (Joiner, 1998) Height 36", bloom 7.5", season M, Rebloom, Evergreen, Tetraploid, 18 buds, 3 branches, Pompeian red with ginger watermark and yellow green throat. (sdlg Ruby Spider) Very distinctive, fertile both ways.

ZACK OF ALL TRADES - Display Only - (Warrell, 2003) Height 34", bloom 8", season M, Dormant, Diploid, 11 buds, 2 branches, UFO Crispate, Melon with wine eye above green throat. (Starsearch Joseph's Coat) An improvement over its parent Joseph's Coat, this is pod fertile and very showy.

ZOLA'S GAZEBO SPIDER - Display Only - (Webster-L., 2007) Height 40", bloom 8", season M, Dormant, Tetraploid, Spider Ratio 7.00:1, Red self above yellow throat. (sdlg sdlg) This tet has a tint of orange that makes this one a screamer!

ZOLA'S HI HO SPIDER - Display Only - Lovely, delicate tet spider.
